Re Item V

**Reasoned statement with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement**

The invention relates to methods for distributing fluids into and out of the channels in a multi-channel monolithic structure according to the preambles of claims 1 and 2. It further relates to a manifold head for distribution of two fluids into and out of the cannels in such a structure according to the preamble of claim 6.

The claimed invention is distinguished therefrom by the respective characterising features. These features allow feeding and distributing two fluids with maximum surface area utilisation. These features are not disclosed nor hinted in the prior art documents cited in the international search report.

It is noted that WO 03/033985 wass published after the filing date of the present application. It does not disclose the feature according to which there is a tunnel provided in the manifold head.
